

2016 Master Datasheet and Vessel Tracking Log, with Entry Guides

part of **2016 Gray Whales Count, Survey Report** © Gray Whales Count, 2016, prepared by Michael H Smith, Project Coordinator, Gray Whales Count, Santa Barbara, California, USA.

2016 Guide to Codes for Master Datasheet

Weather + Sea Conditions

Quality

E	Excellent: No problem with light or glare; excellent contrast; sea state < Beaufort 3, horizon likely sharp $ ullet $ (is at least 3 nm	
G	Good: May be some swell with well dispersed whitecaps, light Beaufort 3. good light & contrast; may be light haze with fuzzy, but distinct horizon. ● Vis to 3 nm	
F	Fair: Low contrast; flat or changing light; may be choppy, Beaufort 3 to light Beaufort 4, some haze, horizon visible. ◆ Vis to 2 nm	
Р	Poor (but acceptable): Likely missing some whales. Poor contrast and/or low light, glare, distortions, haze, or light fog. Steady Beaufort 4. ◆ Vis to 1.7 nm	
NA	Not Acceptable: Beaufort 5 and above, rain or fog. Horizon may be not visible. • Vis < 1.7 nm (Calf migration Vis to 1 nm)	

Beaufort Scale

0	Sea like a mirror; glossy, no sparkles in sun path; sometimes sea looks like ice (less than 1 knot)	
1	Ripples with the appearance of scales are formed; like sand paper; matte, darker vs. zero-Beaufort gloss, lighter; sparkles in sun (1 - 3 knots)	
2	Small wavelets are becoming more articulated. Crests have a glassy appearance: no whitecaps. (4 - 6 knots)	
3	First whitecaps, large wavelets; foam crests begin to appear, but are widely scattered. Mostly dots. (7 - 10 knots)	
4	Small waves with more frequent whitecaps - always apparent - but waves settle instead of breaking; foam along top edge; dots + dashes; waves random, not yet organized (11 - 16 knots)	
5	Moderate waves begin to break with more whitecaps. Becoming organized, lining up (17 - 21 knots)	

Horizon - Clarity

S	Sharp, distinct, very clear (usually, Visibility 3 nm)	
F	Fuzzy: haze, (typical marine condition; Vis up to 3 nm)	
ln	Indeterminate — VERY Fuzzy — haze, heat waves, distortions	
NV	Not Visible: rain, fog, or heavy haze in this condition, not able to use reticle scale	

Visibility - Distance in nautical miles (nm)

3	Equal to or greater than 3 nm (<.1 reticles)		
2	Just beyond Holly: Between 2 and 3 nm (.2 to .1 reticles)		
1.7	At Holly or Campus Point (.25 reticles)		
1.5	Just inside Holly (Horizon Clarity In or NV)		
1	Estimate (Horizon Clarity In or NV)		
<1	Estimate (Horizon Clarity In or NV)
